## A treasure in Tuscany

Vacation apartments are ideal for a holiday in Tuscany, providing the atmosphere and comfort that hotels can't match. That's certainly true of Residence Il Cassero, part of a

medieval walled city dating from the 13th century and full of Tuscan atmosphere and charm – but still with modern conveniences. Guest apartments include kitchens where you can prepare Tuscan delights following a day of touring or shopping in local specialty shops. Apartments have original beamed ceilings and tiled floors, and some feature fireplaces where you can relax with a glass of Tuscan wine. There is also a large Italian-style garden overlooked by a stone tower.

Il Cassero is located in Lucignano between Arezzo and Siena. The unique pear-shaped walled city is considered a rare example of medieval architecture.

## A World of Opposites

Hotel norms will be challenged in Beijing this northern summer with the opening of The Opposite House, a collaboration between an avant-garde Japanese architect and edge Shanghai-based designers. The hotel's exterior is made of striking emerald glass and is integrated into The Village at Sanlitun, Beijing's premier open-plan shopping and entertainment

destination. Interior colours and textures are a vivid mix of modern and traditional, with flowing spaces flooded with light. Among the hotel's many striking features is a stainless steel swimming pool, designed to dramatically reflect natural and exciting fibre-optic light. Guestrooms, meanwhile, are striking open and simple, with natural oak floors, furniture and even bathtubs, with subtle touches of Chinese décor.
